Advisory Action

The Examiner has given full consideration of the amendment filed on February 19, 2002 in Paper No. 7, after Final Office Action of Paper No. 6. However, the limitation in claim 1 "said gate being insulated form said channel region by agate oxide layer comprising silicon dioxide, said gate oxide layer being radiation hardened and less than 1000 Å thick" is required further search. Since applicants did not point out where in the specification the newly added limitation can be found, all of the amendments raise new issues that would have to be thoroughly considered in order to determine if the amendments constitute new matter, and all the amendments would otherwise require further undue consideration and/or search. In addition, there is no convincing showing under 37 CFR 1.116(b) why the proposed amendment is necessary and was not earlier presented.
